Informatics Engineering student at Universitas Negeri Semarang specializing in Fullstack Web Development. Proficient in building responsive and scalable user interfaces using React.js and robust backend systems with Node.js. Passionate about creating seamless web applications and eager to leverage technical skills in a challenging development role.

Work Experience / Project Experience

Asah led by Dicoding - **Remote**   Aug 2025 - Jan 2026

React & Back-End with AI Cohort

Asah led by Dicoding is an intensive technology training program designed for Indonesian university students to prepare them for careers in the tech industry.

- Completed a comprehensive learning path of 12 courses covering Logic, Version Control (Git), Fullstack Web Development, and Artificial Intelligence basics.
- Acquired in-depth competency in building robust web applications using React.js for frontend and Node.js for backend, complemented by foundations in AWS Cloud and Generative AI.
- Capstone Project: AI Learning Insight Designed and implemented the core architecture of an educational platform. Spearheaded the fullstack integration by connecting the React.js frontend with the Node.js backend API. Successfully managed the deployment pipeline to host the application live, ensuring performance and scalability.

Dinas Kearsipan dan Perpustakaaan Provinsi Jawa Tengah -   Mar 2025 - Aug 2025
Semarang, Indonesia

Project Manager Intern

- Led a development team to deliver two key projects: the E-Magang System using React.js and Laravel, and an Archive Service Chatbot using Python.
- Managed project lifecycles by defining scopes, monitoring progress, and coordinating between frontend and backend teams to ensure on-time delivery.
- Facilitated communication with stakeholders to gather requirements and produced comprehensive technical documentation for system handover and user guides.

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka   Sep 2024 - Jan 2025
- Remote

Mobile Developer Cohort

Bangkit Academy is an intensive career readiness program for Indonesian students, designed by Google in partnership with GoTo and Traveloka.

- Assisted in leading the development lifecycle of FitJourney, a capstone mobile application dedicated to calorie tracking and fitness goal achievement.
- Designed high-fidelity UI/UX prototypes using Figma, specifically crafting an intuitive and visually appealing interface for the authentication module.
- Successfully engineered the login functionality using Kotlin, ensuring seamless user authentication and delivering a frictionless onboarding experience.
